CONNECTED
CARE PARTNERS

COMMON PRACTICE

Greetings,

Connected Care Partners is now comprised of more than 300 primary care providers across north Mississippi and northwest Alabama, and we are very proud to count you in that number. As an Advanced Practice Clinician (APC), you are part of a group that is responsible for delivering more than half of all primary care services across this region. One of our key objectives is to deliver tangible value to you as this network continues to move forward. To this end, the Primary Care Collaborative of Connected Care Partners has identified these early opportunities to support APCs:

- Monthly newsletters highlighting care guidelines for common primary care complaints
- Assistance with monitoring and improving quality metrics
- Economies of scale and preferred pricing for Connected Care Partners-selected solutions
- Access to provider information including CEU opportunities
- Access to a Precepting Program with Connected Care Partners collaborating physicians through a "pod" approach that will allow providers to network and share best practices

In the upcoming weeks, a Connected Care Partners representative will be contacting your office to set up a visit with you to detail these initiatives.

If you have any questions or would like additional information in the meantime, please feel free to contact Whitney Sparks at WBonner@nmhs.net or Alison Gilbert at (662) 377-5763.
